## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 10/30/07 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 296, 299 and 302 are rejected under 35 U.S.C. 102(b) as being anticipated by Mauclair et al. (US 5,268,371).

Mauclair et al. discloses non-metallic porphyrin comprising a reactive group directly or indirectly attached to any one of the four non-pyrrole positions. (Col. 3).

Col. 12 example 5 shows a reactive group attached to the non-metallic porphyrin through a linker.

Col. 9 lines 28-34 shows that a target can be attached. Said target can be antigens which is viewed to be inclusive of nucleic acid, nucleotides or nucleic analog.

Claims 300, 301, 303 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 287, 290-295 are allowed.
